Overview

SEVP uses a webinar service to conduct its SEVIS Update Webinars, which requires participants to complete a one-time webinar account set-up, in tandem with the webinar registration process. It takes only a few minutes and is easy to complete.

The webinar account set-up is a one-time process. **Make note of the password you create, as you will need your e-mail address and password to log into the webinar, as well as to register for future webinars.**

You can complete your registration and log in even if the webinar has already started. There is no time limit for either of these processes.
